

We enable digital business

Supporting you throughout your digital transformation journey

Today's digital world has blurred the lines between physical and digital environments. Our experienced consultants can help you to place technology at the heart of your business strategy and build innovative digital solutions that integrate people and business.

Your strategic digital partner

With over 30 years of experience and an industry recognized skillset, Digimark is one of Greece's fastest growing consultancy, managed service and infrastructure providers.

We understand how digital business is evolving. Our Unified Communications, Network and Cloud Computing solutions enable effective communication with your customers, suppliers, and partners as well as with your colleagues across multiple locations. We help our customers remove geographical boundaries.

We have built partnerships with best-of breed vendors and global carriers. Being an independent service provider, however, means we are able to design the best value options for your business.

We take time to understand your business requirements and then design and deliver the most appropriate and strategic solutions to best suit your digital needs. We have the skills to provide our clients one-stop services from consultancy and design to project management, installation and ongoing support.

Digital strategy is a constantly evolving journey

30

Years of experience

24/7

Support

Solutions tailored to your business

Our extensive range of services and products means we can provide everything you need to create a robust infrastructure that underpins your digital strategy from going mobile to data analytics and automation. With the right use of digital resources you can make better strategic decisions, increase employee satisfaction and improve customer experience.

Networks

Bespoke, reliable and entirely flexible connectivity and networking solutions enable effective communication and maximize individual and team performance.

Unified Communications

Unified Communications solutions bring together different communication methods, from email and instant messaging to video conferencing and telephony, into a single user experience.

Cloud

Migrating your technology environment to the cloud provides the flexible consumption models to match your ever-changing business demands.

On-premise infrastructure

Design, delivery and integration of the on premise infrastructure required to deliver true hybrid solutions and bridge the gap between cloud and traditional environments.

Services

Business transformation and technology advice across the whole project lifecycle, from Consultancy and Design to Project Management, Installation, Commissioning and ongoing Support.

Digimark DNA

Digimark Cloud, our multiservice platform is developed, owned and operated by your in-house teams. Innovative technologies from global leader and presence in five Tier 3+ data centers in Europe and Greece enable us to deliver optimum solutions tailored to your demands.

We take pride in investing in people; our directly-employed consultants, technicians and NOC staff are trained to the highest standards. Their commitment, passion and drive, combined with extensive market knowledge, are invaluable when delivering innovative and financially viable strategic solutions to our clients.

Flexible support models guarantee a personal and proactive engagement for end users and IT management, on-site or remote, 24x7. Our Greece based NOC ensures that your services are supported and maintained to the highest standards– with a 97% SLA performance giving you a total peace of mind.

Our clients are at the core of everything we do. We focus on creating, developing and sustaining long-term partnerships, as our 99% client retention rate demonstrates
